VOLUME 18, NUMBER 2

January 21, 2019

To: Members

From: David Crothers, Executive Vice President

Today is Day 11 of the Sixty-Sixth Legislative Assembly. The North Dakota Constitution limits legislative days to 80 every biennium. This year's session is proving to be especially busy with a significant increase in the number of bills introduced compared to the 2017 session. During the last legislature there were approximately 740 bills introduced during the entire session. To date, 546 bills have been introduced in the House of Representatives and 334 in the North Dakota State Senate. In discussions with the director of the Legislative Council, the Association was told there will likely be another 40-50 more bills introduced this session. Additionally, slightly more than 25 "concurrent resolutions" have been introduced in the two houses.

The bill introduction period is drawing to a close, however, last Monday was the final day for members of the House of Representatives to introduce legislation. Today is the last day for Senators to introduce their legislation. Thursday is the deadline for members of the legislature to introduce resolutions.

The Association attended committee hearings for House Bill 1161, the measure to prohibit false information from being entered into Caller Identification Systems and HB 1171. House Bill 1171 seeks to create a \$10 million grant program to develop and promote a "skilled work force" in North Dakota by providing \$8,500 annual tuition grants to individuals enrolled in designated diploma and certificate programs. On Friday, the Association testified before the Senate Energy and Natural Resources Committee and offered an amendment to Senate Bill 2044. The legislation provides for enhanced penalties for those who damage critical infrastructure in North Dakota. Included in the definition of "critical infrastructure" is telecommunications, but only included a company's central offices. The Association provided committee members with an amendment that would include all broadband company infrastructure, not just a central office. The committee did not vote on either amendments or a committee recommendation but will do so at a later date.

As you will note on the following pages of the Legislative Report, additional bills have been added to those being followed by the Association and membership. Of particular concern is Senate Bill 2318, which seeks to separate student housing on campuses administered by the State Board of Higher Education from the StageNet network administered by North Dakota's Information Technology Department. Dakota Carrier Network currently holds that contract, but separating the housing portion with its higher density from the rest of the State would cause the prices for schools and smaller counties to increase. The bill is simply an effort to pluck some of the "low hanging fruit", which is cheaper to serve, from the integrated system and network of K-12, cities, counties, State agencies and National Guard armories that ITD has created to affordably serve the State.

The coming week will be busy and features BAND's biennial Legislative Dinner in honor of those serving in the State's Legislature. We currently have RSVP's from 270 and look forward to the directors, managers and senior staff that will be with us on Tuesday night to greet legislators and share our concern over some of the issues before that body this year. Those issues are included in the following pages of this report.

The BAND board of directors will also be meeting prior to the Legislative Dinner. The following morning, broadband company managers will be holding one of their periodic industry meetings with the Commissioners of North Dakota's Public Service Commission.

Members of the Association's Legislative Committee include: Derrick Bulawa, BEK Communications; Paul Schuetzler, Consolidated Telcom; Keith Larson, Dakota Central; Ralph Neu, Dickey Rural; Tyler Kilde, MLGC; Jeremy Becker, NCC; Karl Blake, Polar Communications; Dave Gauslow, Red River; Brooks Goodall, Reservation Telephone; Jim Newman, SRT and Troy Schilling, West River.

Please contact me at any time regarding any of the legislation or any other matter of concern. I can be reached at work: 701-663-1099; cell: 701-471-3838 or dcrothers@yahoo.com.

HB 1021

The Information Technology Department's appropriations bill for the next two years. The agency's appropriation pays for, among other things, the costs of providing network and telecom to all of the State agencies, K-12, cities, counties and the higher education system. Dakota Carrier Network currently holds that contract. The Association seldom testifies or advocates for agency appropriations, but monitors them and attends hearings to ensure that adverse policy is not adopted.

Jan. 11 Introduced in House.

Jan. 16 Appropriations Committee Hearing.

HB 1066

The legislation is one of the centerpieces of Republican leaderships' initiatives this session. In essence, it is a redistribution of monies generated by the oil and gas revenues to governmental entities. It is a complex formula. This bill creates a new fund, the Municipal Infrastructure Fund, for the purpose of providing grants to cities located in non-oil producing counties and may only be used for essential infrastructure projects. The term "essential infrastructure project" means capital construction projects to construct new infrastructure or to replace existing infrastructure. It does not include debt repayments and routine maintenance or repair projects. There are 9 eligible uses for these grants including "communications infrastructure". The Association has a concern that may include cities providing their own telecom and broadband infrastructure. HB 1066 also creates a "County and Township Infrastructure Fund", but its eligible uses are limited to road and bridge projects.

Jan. 3 Introduced in House.

Jan. 15 Finance and Taxation Committee Hearing.

HB 1157

A bill that would prohibit those who are planning, installing, altering or repairing a fire detection system from doing the work unless they were licensed by the State Electrical Board. The legislation would specifically exclude those who are doing similar low-voltage work on audio systems, video system, computer network system, home automation system or security system. This bill is significant because of another bill the Association is watching for where the State Electrical Board is seeking to expand its jurisdiction over "Power Limited Technicians". Essentially, members within the electrical industry are in conflict about who and what projects should be subject to licensure by the State Board. The Association will continue to attend hearings to see if this bill is amended. Specifically, whether there is an effort to license telecom and broadband company employees.

Jan. 3 Introduced in House.

Jan. 15 Industry, Business and Labor Committee Hearing.

HB 1161

A bill prohibiting the entry of false information into a "telephone caller identification system" with the intent to deceive, defraud or mislead. The legislation outlaws entering false information or placing a call knowing that false information was entered into the Caller ID system with the intent to mislead or defraud. The Association believes the bill was

introduced to target one of the most common practices of robocallers. There are a number of exemptions to the bill, including a provision exempting telecom, VoIP and broadband providers who are acting solely as a means of transmission of a “call” between recipient and sender. Other exemptions are afforded the blocking of caller identification information, law enforcement agencies and intelligence and security agencies of the Federal government.

Jan. 3 Introduced in House.

Jan. 15 Industry, Business and Labor Committee Hearing.

HB 1171

Legislation to create a skilled workforce student grant program. The bill directs the Bank of North Dakota to develop in conjunction with Higher Ed in the State and the North Dakota Workforce Development Council a grant program to attract and retain individuals for technical and professional skills in North Dakota. The grant to each participant would be \$8,500 annually with a cap of \$17,500. The Workforce Council will determine each year which professions qualify for the funding. The program will initially receive \$10,000,000 in seed money to establish the fund and the initiative will be treated as a revolving loan fund after that.

Jan. 3 Introduced in House.

Jan. 16 Industry, Business and Labor Committee Hearing.

HB 1195

The bill expands upon the duties of merchants when using “automatic renewals” in consumer agreements. It would apply to a consumer who borrows, buys, leases or obtains personal property, real property or services for consideration. It would require consumers to initial each clause. It would require a merchant to provide a “cost-effective, timely and simple procedure” for cancellation. The legislation requires that a customer be sent by registered mail a notice if there is a renewal for in excess of 31 days explaining how to cancel the contract. It would also require affirmative action by the consumer before there can be a renewal. House Bill 1195 contains a provision exempting the “sale of public utilities” regulated under Title 49 of the North Dakota Century Code, which would address the telecom services provided by BAND Association members, but it is the organization’s opinion that it would not include broadband or video services.

Jan. 3 Introduced in House. Referred to Industry, Business and Labor Committee.

HB 1217

Legislation that effectively outlaws competition from North Dakota State government with private industry. The bill allows an individual directly affected by competition with a State agency or institution to petition the Public Service Commission for a hearing. If the PSC finds that a government entity is competing with private industry to provide goods or services it shall direct the agency to terminate the activity unless; 1) Cessation of the activity will create an emergency; 2) the cost of providing the service through private enterprise will cost at least ten percent more than the government is providing it for, or; 3) private enterprise cannot adequately provide the service, or; 4) ceasing the activity will cause irreparable harm or loss of substantial invested funds. If the Public Service Commission finds a State agency is competing with private industry the activity must cease upon the completion of any contracts it may have to provide that service. HB 1217 will be monitored by the Association because of its pertinence to municipalities or State agencies providing, or contemplating, market entry for broadband services.

Jan. 3 Introduced in House. Referred to Government and Veterans Affairs Committee.

HB 1329

A bill to appropriate \$225,000 to the Department of Human Services for a grant to enhance and expand services to connect telephone callers to behavioral health services. The money will be used to expand Statewide access for callers and those texting to health and human service programs, mental health support, substance abuse services, gambling addiction, services for the elderly, residents with disabilities and support for military, veterans and military families. The Association will work to ensure that broadband companies are not required to provide any services without compensation or unreasonable regulatory filings.

Jan. 8 Introduced in House. Referred to Human Services Committee.

HB 1362

Legislation to put into statute the ability and requirements for utilities to cross railroad property in the State of North Dakota. The 6 railroad companies serving the State have always resisted having a policy in State law and, instead, only offered agreements with affected industries. The result has been widely disparate agreements between utilities and the railroads. House Bill 1362 has three fundamental principles: First, it establishes the cost of a permit for a utility seeking to cross railroad

property at \$750. Second, the legislation allows a utility to begin crossing the railroad property 31 days after sending a registered letter with the permit fee, proof of insurance coverage and engineer's drawings of the proposed crossing. Third, establishes the right of utilities to use the public right of way without paying the railroad a fee. The utilities included in HB 1362 are 1) water, 2) sewage, 3) electronic, 4) telephone, data and telegraphic communications, 5) fiber optics, 6) cablevision, 7) electric energy, 8) oil, gas, hazardous liquids or 9) other substances, including pipes, sewers, conduits, cables, valves, lines, wires, manholes or attachments. The Association intends to actively advocate for passage of the bill.

Jan. 10 Introduced in House. Referred to Political Subdivisions Committee.

HB 1435

Legislation that furthers State and local governments' attempt to build a Statewide radio network in North Dakota. Today, the radios used by emergency personnel in North Dakota are "unable to talk to each other" and there are not enough towers. This bill is the third in the last three sessions to eliminate that problem. HB 1435 creates an \$80 million line of credit at the Bank of North Dakota for the Information Technology Department to carry out "Statewide interoperable radio network projects" as they are approved by the State legislature. Motorola is heavily involved in this bill and is one of the prime advocates of it in the legislature. Presumably Dakota Carrier Network would be a primary carrier for carrying the backhaul from the hundreds of towers throughout the State that would be required to carry the State's traffic. This bill also appropriates \$40 million additional dollars from the Strategic Investment and Improvements Fund to pay for the network.

Jan. 14 Introduced in House. Referred to Government and Veteran's Affairs Committee.

HB 1474

A measure that allows cities and counties to implement an infrastructure tax in lieu of a city adopting special assessments to fund road repair and construction and other projects of public benefit. It allows the government to levy an "infrastructure tax" on all residential and commercial utility bills. If a municipality implements the infrastructure tax it also has the authority to levy and collect a "green field" special assessment tax. Green fields are undeveloped property that infrastructure is brought to. The Association has long opposed placing taxes on utility

bills as a means of funding other areas of political subdivisions. We are particularly concerned the authorized tax on utilities will not include a similar tax on wireless, video and other broadband providers.

Jan. 14 Introduced in House. Referred to Political Subdivisions Committee.

HB 1542

A bill to create a task force to study the needs and challenges of North Dakota's autonomous ecosystem. The legislation names representatives to the task force and charges them with assessing the State's current capabilities and needs going forward. Presumably it will focus on unmanned aerial vehicles and autonomous use of highways. Both will use immense amounts of data. The Association intends to participate in the hearings and ensuring the task force understands the capacity and expertise the broadband providers of North Dakota.

Jan. 14 Introduced in House. Referred to Industry, Business and Labor Committee.

HCR 3005

A concurrent resolution urging Congress and the President of the United States to coordinate efforts to fight and provide an effective and innovative solution to combat illegal and unsolicited robocalls. Sponsors of the resolution testified that robocalls account for 98 million separate calls each day to United States households that result in \$9.5 billion annually in fraud. They further testified that small business in the nation waste an estimated 20 million hours annually dealing with illegal, unsolicited and unwanted robocalls, which lead to a minimum of \$475 million in lost productivity each year.

Jan. 3 Introduced in House.

Jan. 10 House Passed 89-0.

SB 2044

A bill updating and expanding the definition and penalties for tampering with or damaging critical infrastructure facilities or a public service. There has long been a law in North Dakota making criminal the act of damage to public communications, transportation, water, gas or power facilities. This legislation expands the law and defines it as all "critical infrastructure" and adds more industries to the list, including a telecom's central office and wireless telecom infrastructure. The bill further

expands the current law by including “conspirators” of those damaging the infrastructure and provides an enhanced penalty.

Jan. 3 Introduced in House.

Jan. 18 Energy and Natural Resources Committee Hearing.

SB 2318

A bill saying it is the Legislature’s “intent” that ITD enter a contract to “provide broadband capabilities within student housing facilities at institutions under the control of the State Board of Higher Education. The Association has long been aware of an effort to separate student housing from the StageNet contract. That contract is currently held by Dakota Carrier Network. The legislation further directs ITD to work with colleges when developing requirements and selecting the broadband service solution. The Association is trying to determine exactly what SB 2318 means. First, we don’t believe we have ever seen a bill that says it is the “intent” of the Legislature that a State agency enter a contract. They would normally just direct the agency to do it. Second, providing broadband to University student housing outside of the ITD master contract would violate a separate State law. We will recommend to the Association’s Legislative Committee that this bill be one of the greatest priorities during the Sixty-Sixth Legislative Assembly.

Jan. 18 Introduced in Senate. Referred to Political Subdivisions Committee.
